Hi Jeff et al:

As discussed, I will (b) (6) . My backup is Kinley Deller (copied here). His phone is 206-477-5272. Kinley coordinates our sheriff enforcement for solid waste and has been briefed on the project. He can also provide other coordination/support needed from the county. If you do decide you want sheriff support please give is some lead time as we need to schedule the Detective(s) ahead of time.

Hopefully the access issues will be addressed. I look forward to visiting the field work on the week of November 26 if feasible, or when convenient to the project team.

Thanks,
Jim

Subject: Pillon property

Hi, James. I'm pleased to report that our contractors have received their task orders and are now fully able to begin planning and preparing in earnest for our November 12 mobilization. I have copied Steve Hall and Seth Wing from ENE on this email. I told them in the kickoff meeting this morning that I was going to connect them with you for coordination with certain aspects of the investigation we are undertaking at Pillon.

EPA has agreed to conduct a round of surface water sampling during our removal action. Ecology and/or King County conducted surface water sampling during the 2016 field investigation. Do you have or do you know where we can obtain a copy of the report for that event? In particular, we are looking for the locations from where the samples were collected. I assume Ecology or KC put some effort into the strategy they used to determine where to collect those samples and that would help us get our planning done. Also, if you have any suggestions regarding additional or better sampling locations, that would be very helpful.

Thanks, James. Any help you can give will allow us to be better prepared when we finally get site access and mobilize.
